AMERICAN EAGLE Glacier™

Introducing: American Eagle Glacier™

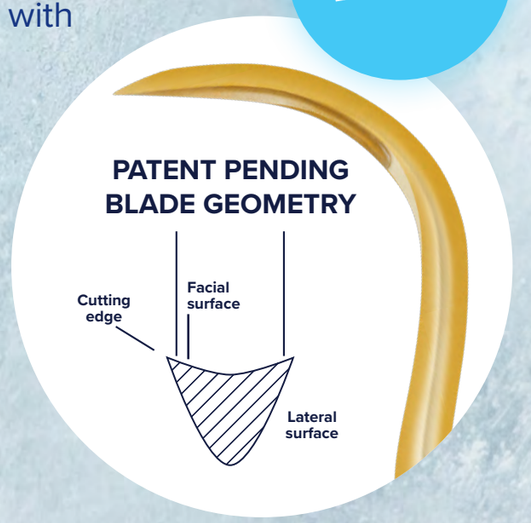

The sharpest blade we have ever made.

NEW!

Advanced blade geometry meets sharpen-free XP² Technology™. Effortless calculus removal with every stroke.

The Glacier™ tip (patent pending) features a precise groove along the facial surface and an optimised blade geometry, ensuring a **particularly sharp cutting edge** – permanently. Glacier™ allows you to work fatigue-free and without pressure, delivering more effective scaling and perfect adaptation of the working end.

As Glacier is based on **XP² Sharpen-Free Technology**, this edge **never needs to be sharpened**. It maintains its peak performance even longer than our standard XP² instruments – stroke after stroke, patient after patient.

93%*

of all surveyed DHs would recommend this instrument and rate it 4.8 stars!

4.8 ★★★★½

**Based on a consumer perception study with 48 people after 6 weeks.*

American Eagle INSTRUMENTS®

American Eagle XP² Technology™

Sharpen-free scalers and curettes

Easy navigation in periodontal pockets and interproximal areas thanks to **slimmer, precision-crafted working ends.**

Gentle yet effective scaling: calculus and hard deposits are removed layer by layer with “shaving” strokes – for a treatment that is gentle on patients and practitioners alike.

✓ **No sharpening and more time for what matters most: your patients!**

25% off all **XP² Instruments incl. Quik-Tip®**

Only two instruments for all tooth surfaces:

Microbrush International

Original Microbrush®

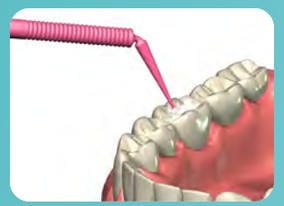

Consistent, reliable quality

20% off all **Microbrush®**

- ✓ Non-absorbent fibre tips and bendable neck
- ✓ Precise placement of material
- ✓ 4 sizes and countless colours
- ✓ Ideal for applying fluoride and chlorhexidine varnishes
- ✓ Fine or superfine applicators, optimal for bracket-surround sealants or therapy at the crown margin

dry tips®

DryTips®

The ultimate saliva control

DryTips® are ideal for impressions, orthodontics, composites, fissure sealants, fluoridation and more, as they reliably contain saliva. **One DryTip replaces up to 6 cotton rolls**. In addition to effectively covering the parotid duct, they provide **optimal protection for the buccal mucosa, during air polishing and machine-assisted work (e.g. ultrasonic instrumentation)**.

20% off all **DryTips®**

Bring fun into children's prophylaxis
